Job Title **Global Information Technology Intern**

Summary The Summer Internship is a three-month program that offers hands-on learning experiences. Interns are able to build on skill sets such as teamwork, leadership, quality commitment, and business acumen and are encouraged to develop and customize their own set of business skills and tools to function in the Corporation. Interns are expected to assume significant responsibility, supporting project work, leading to rapid personal growth and development of new skills.

Participate in process related assessment, analysis, and design activities for Global IT initiatives in various functional areas such as Bioscience IT, Risk Management, Enterprise Architecture or Operations IT.

Essential Duties and Responsibilities To support GIT initiatives, the incumbent must demonstrate basic understanding of business concepts and processes with moderate direction, be a self-starter willing to tackle complex problems, possess some knowledge of or have an interest in learning project development skills and have solid communication and interpersonal skills.

- 1) Support the development of project plans
- 2) Work with others to determine project priorities and schedules
- 3) Responsible for reviewing project deliverables to ensure quality (design walk-through, test results, etc.)
- 4) Respond to and troubleshoot escalated problems and questions
- 5) Assist with financial planning/budgeting activities
- 6) Support the development and analysis of effectiveness metrics

Qualifications Good understanding of business concepts. Must have a solid process orientation. Strong team player, willing and able to support other team members as needed to achieve project goals. Must possess good communication skills both verbal and written.

Education and/or experience

- Candidate must be enrolled in a College program
- Entering Sophomore, Junior or Seniors may apply
- Previous internship or work experience in a corporate environment is a plus

Major(s) preferred: General Management, Business Administration, Computer Science, Engineering
